

Bring your back
and neck pain to our

Rehab In Motion Physical Therapy Center

Introduce yourself to our Physical Therapy Center.

At our Rehab In Motion Physical Therapy Center, we can help you with everything from chronic neck pain to sports-related ankle injuries and nearly every type of injury or chronic pain in between.

We combine hands-on therapy with a helpful, friendly staff, so now there's no more excuse for you to live with your pain. Using our hands-on approach, we actually feel the problem areas. The manual technique enables us to make accurate diagnoses and treatment recommendations that provide rapid recovery.

What's more, we're enthusiastic, motivated and positive with our patients. We always take the time to explain procedures and recommendations thoroughly. We also provide thorough exams, discuss options, explain programs and answer your questions. You'll never feel rushed. You'll always have the same physical therapist right beside you, every step of the way on your journey to recovery.
